

Furnier American Walnut

Specification Sheet

A much sought-after furniture wood, American Walnut is generally used for interior architectural woodwork. Its exceptional strength also makes it suitable for the production of chairs and seating. American Walnut's distinctive "bird pecks" - fingernail size knots and pockets in the prized dark brown wood - are a defining feature. Available on Birch plywood or MR-MDF cores, the very smooth surface takes all stains easily and is well-suited to polishing. Matching edge tapes are also available.

Product Info

Code	Sheet Size	Thickness	Core	Weight	Grading
V19-MDF-18Wt	2440 x 1220	19mm	MR-MDF	41.3kg	AB

Technical Specs

Colour:	Dark brown grain
Texture:	Raw, Sanded
Glue bond:	Veneer - PVAC D3 (EN204) Birch - Exterior Phenolic
Origin:	Veneer - America, Manufacture - Slovakia
Certification:	FSC & PEFC Certified Supplier

Ideal Uses

- Kitchen Cabinetry
- Wall Panelling
- Commercial Cabinetry
- Commercial and hospitality furniture

Handling & Application/ Furnier, despite being a very durable product is still vulnerable to moisture and UV. Consequently it is the users responsibility to ensure the sheets are sealed with a protective coating to give the product the necessary protection from UV moisture and for the desired performance. This is a natural product that can be affected by changes in weather conditions: moisture and temperature. Increased moisture content temperature variation may cause internal stresses causing previously flat sheets to bow.

At Plymasters, precautions are taken to minimise this effect. However, once the panel has left our warehouse we cannot guarantee sheets to remain flat unless fastened. This is particularly important where free standing kitchen/ cabinet doors are concerned. When storing panels, stack on a firm raised base with enough support to prevent sagging. Cover the pallet to protect top and edges.
