

Colour Oak Beam Oak Bronze

Specification Sheet

Beam Oak Bronze has a very rustic appearance, with numerous imperfections giving it real character. Large and small splits and knots and a veneer laid in random planks provide the beam effect. The bronze colour is achieved through a process of dyeing, rather than staining, for colour consistency and depth. This is available on a MR-MDF core. Matching edge tape available.

Product Info

Code	Sheet Size	Thickness	Core	Weight	Grading
VC19-MDF-18-BmBrz	2440 x 1220	19mm	MR-MDF	37.5kg	Face Back

Technical Specs

Colour	Beam Oak Colour Dyed Bronze
Finish	8-10% Gloss Lacquer
Glue bond	Veneer - PVAC D3 (EN204)
Origin	Northern Europe
Certification	PEFC Certified Supplier

Ideal Uses

- Kitchen Cabinetry
- Commercial Cabinetry
- Wall Panelling
- Commercial and hospitality furniture

Handling & Application/ Coloured Oaks, despite being a very durable product is still vulnerable to moisture and UV. Consequently it is the users responsibility to ensure the sheets are sealed with a protective coating to give the product the necessary protection from UV moisture and for the desired performance. This is a natural product that can be affected by changes in weather conditions: moisture and temperature. Increased moisture content temperature variation may cause internal stresses causing previously flat sheets to bow.

At Plymasters, precautions are taken to minimise this effect. However, once the panel has left our warehouse we cannot guarantee sheets to remain flat unless fastened. This is particularly important where free standing kitchen/cabinet doors are concerned. When storing panels, stack on a firm raised base with enough support to prevent sagging. Cover the pallet to protect top and edges.
