

Chilean Pine

Specification Sheet

Plymasters Chilean Radiata Pine is manufactured from the same species of timber as NZ Pine. This is a rotary cut softwood and all veneers are sourced from plantations. The clears face appearance grades are economically priced and it makes a very popular choice for cabinetry and lining. The face quality is slightly lower grade than NZ Pine.

Product Info

Code	Sheet Size	Thickness	Weight	Grading
J1069	2400 x 1200	18mm	25.9kg	BB
J1078	2440 x 1220	25mm	36kg	BB

Technical Specs

Colour	100% Pinus Radiata, Creamy Yellow
Texture	Fine Grain, Softwood
Glue bond	Phenolic A-Bond. Exterior Glue Line
Origin	PEFC 24-44-100 Plantation Source, Chile
Certification	AS/NZ 2269 - FSC certified Manufacturer
Emissions	Class EO

Ideal Uses

- Cabinetry
- Furniture
- Interior Linings
- Joinery

Handling & Application/ Plywood is a natural product that can be affected by changes in weather conditions: moisture and temperature. Increased moisture content or temperature variation may cause internal stresses causing previously flat sheets to bow. At Plymasters, precautions are taken to minimize this effect. Note, Chilean Pine sanded finish is not as smooth as NZ Pine Ply.

However, once the plywood has left our warehouse we cannot guarantee sheets to remain flat unless fastened. This is particularly important with pine ply (as it is a softwood), where free standing kitchen/cabinet doors are concerned. When storing panels, stack on a firm raised base with enough support to prevent sagging. Cover the pallet to protect top and edges.
