

Gaboon BS1088

Specification Sheet

Plymasters BS1088 Marine Grade Gaboon has excellent edge detail. It has an attractive light pink, almost neutral colour, with a consistent grain. Lighter weight than other hardwoods, gaboon is very popular in joinery and linings. Lower grades of gaboon are also available.

BS 1088 is the British Standard specification for marine plywood that applies to plywood produced with untreated tropical hardwood veneers that have a set level of resistance to fungal attack. The plies are bonded with Weather Boil Proof (WBP) glue.

Although this is a British Standard, the finished product does not have to be made in Britain, just manufactured to meet the standard.

Gaboon BS1088

Code	Sheet Size	Thickness	Weight	Grading
H1027-B	2440 x 1220	12mm	18kg	BS1088 Marine
H1036-B	2440 x 1220	18mm	27.5kg	BS1088 Marine

Oversized Gaboon BS1088

Code	Sheet Size	Thickness	Weight	Grading
H1080	3100 x 1220	18mm	43.7kg	BB/CC - BS1088

Technical Specs

Colour	Consistent Light / Med Pink / Neutral Colouring
Core	Okoume/Gaboon
Origin	Italy
Emissions	Class E1

Ideal Uses

- Furniture and Architectural Fit-outs
- High-end Cabinetry
- Boat Building
- Residential Linings

Handling & Application / Plywood is a natural product that can be affected by changes in weather conditions: moisture and temperature. Increased moisture content or temperature variation may cause internal stresses causing previously flat sheets to bow.

At Plymasters, precautions are taken to minimise this effect. However, once the plywood has left our warehouse we cannot guarantee sheets to remain flat unless fastened. This is particularly important where free standing kitchen/cabinet doors are concerned. When storing panels, stack on a firm raised base with enough support to prevent sagging. Cover the pallet to protect top and edges.
