Texture	Suede Matte (SM) or Light Embossed (LE)
Core	Moisture resistant MDF core
Origin	Malaysia
Environment	MDF - E1 Rating

HANDLING & APPLICATION / Melaboard panels are not suitable for use in exterior applications or interior projects where the moisture content would be higher than normal (for eg. a indoor pool or sauna). Melamine has excellent water resistance properties however care should be taken not to expose the edges to high moisture applications. Melaboard panels are low maintenance, cost effective and easy to clean.
