Plymasters Show room, leading the way...

HOME IDEAS
GET INSPIRED

We have been thrilled with the near completion of our show room in Auckland at the Home Ideas Centre in Parnell. It has been a long journey and one that has been stretched out further due to Covid and lockdowns but now seeing our concept come to life has been a huge win for us.

If you are in Auckland, do head in and view almost all our products (!!). No more second guessing on colours, textures and products anymore. Having a space to showcase our full incredible range has now gone from a pipe dream to reality. We hope you enjoy it as much as we do. Our Sales Reps love meeting clients there too, as it saves them from carting too many samples around!

Want to learn more?

Would you like to learn more about our products and the benefits they will provide to your clients? Get in touch to arrange a Product Information session at The Home Ideas Centre in Parnell or we can come to you. Just like these lovely Auckland Interior and Kitchen Designers like Allison McDonald, Toni Roberts and friends have done. We are extremely happy to help impart a bit of Ply and Panel knowledge your way.

Charisma & Perfect Matte Sample Boxes

NEW COLOUR: A new panel has just landed on NZ shores for us here in our Charisma range which we are rapt with and have had incredible feedback on so far. **Metallic Anthracite** is a warm earthy brown colour that exudes sophistication and elegance. Especially paired with a grey concrete countertop or a polished black granite benchtop.

Would you like to experience our new premium Acrylic Birch or Melaboard products in a gorgeous new eco-friendly box? Fresh new boxes of Charisma Acrylic & Perfect Matte Melaboard samples have now landed in our laps.

If you would like to order one and experience the lovely matte or anti-fingerprint qualities of these premium products or colour match to suit, please get in touch with us today. There are six colours in the Charisma and five colours in the Perfect Matte ranges. Check out the Kitchen on the next page that features White Charisma. Simply stunning.

Charisma Range

Veneer Project/ Beam Oak Bronze

Displayed here is a ensuite that shows off our Beam Oak Bronze Timber Veneer Panel. Ryan's Kitchens and Joinery in Christchurch has designed this custom vanity with our Beam Oak Bronze and a Corian top in Glacier White. As you can see this Veneer shows off its numerous imperfections which give it real character. We love receiving your project photos as we get a kick out of seeing our panels come to life with your imagination and clever joinery skills. Got something to share then send it in to info@plymasters.co.nz

Giving Back

We love to give back to our communities here at Plymasters and quarterly we get to do just that! Last month we chose to give \$1000 to The Brain Injured Childrens Trust in New Zealand. It's a pretty small charity but one we felt could really do with a helping hand.

Feature Project/ White Charisma Whangamata

Jenny Holmes, A Kitchen Designer from Design Marked created this beautiful kitchen below for her lucky client in Whangamata. Beaver Kitchens expertly installed it using our White Charisma Acrylic Birch for the cabinetry. We love the crisp matte freshness this panel exudes and also the stunning edge detail too. Thanks to John Williams for the stunning photos.

The Acrylic surface is from our supplier Senosan in Austria - a premium European product. Their scratch and abrasion resistance is significantly higher than other standard matte surfaces. The substrate is the ultimate, European Multiply Birch Core at a thickness of 17.5mm. Also the panels are UV resistant, which is perfect for the many sunny days that this Kitchen will receive in years to come.

TOP TIP:

Daniel Sinclair from DC Joinery, Taranaki reports on the Charisma Panels: "I'm very happy with how well the panel cuts, seven sheets and not one of them bound up. I run a negative hook hollow ground 60T blade and it all went through as smooth as silk. No need to oversize and spindle. I'm very pleased to say that I can handle it with ease so now it will be a star on our facing product menu. A big thank you goes out to Plymasters for bringing this product to our shores."

The Green School

Recently we partnered with ArchiPro to promote The Green School build and design in Oakura. What an incredible build to have our Flameshield Poplar feature so heavily in. We collaborated with Boon Architects and provided them with our Flameshield to line these pods as seen above and below. This material is perfect for any commercial build as it is an innovative plywood that has been soaked in a fire retardant, rather than having a treatment painted hence it can be sanded or machined without losing any of its fire-retardant qualities. It is aesthetically pleasing and offers a practical solution to increasingly stringent fire regulations for commercial and public buildings, including restaurants and schools.

Check out our website to see this project come to life, on our 'About' page.
Paul Brandon is the videographer who captured this video and photos displayed here.

Meet our Knowledgeable Sales Reps

If you're a long time client you will definitely know our Sales Manager - Fraser Currie. Having been in the company since it's creation as Summit Distributors, he know's all the in's and out's of our extensive range. Test out his knowledge the next time he call's in. Fraser services the regions of Central Otago, Canterbury, Southland, Northland and the North Shore. Contact Fraser on 021 220 1075

Meet The Queen of Ply! Deshia has been part of the Customer Service team for five years and now mans the Internal Sales side of the business. Most of you will know her for her great product knowledge, a laugh and her deep southern accent with her rolled R's on the phone! Deshia gets out on the road at times to visit her clients and is always up for a chat so give her a call today on 06 281 3632

Chloe may be our latest Sales Rep to the team but is no stranger to the Building and Construction Industry having worked in it for the last decade. Chloe looks after the Auckland region, Waikato and now Bay of Plenty. When she's not busy touring around the Upper North Island she's busy running around after her two young children. Get in touch with Chloe to chat about upcoming projects and products on 021 461 594

Also new to the Plymasters team, Derek McInnes comes from the Building and Construction Industry and definitely knows what he's on about. You will feel at ease with Derek, as he's the most positive and kind Sales Rep to grace your space. Derek looks after the lower North Island from Hawkes Bay, Taranaki to Taupo, Wellington, Nelson and Marlborough. Give Derek a call today on 027 415 9101

Ceiling Linings Project/ Showhome, Taupo

Renee Woods, an Architect at Design Builders has created a masterpiece with their new showhome in Taupo. Design Builders have created over 500 homes since their conception in 1992 with over 133 awards won. They entered the build into the Master Builders House of the Year award, where no doubt they will pick up another one. Our Canadian Oak Panels adorn the ceiling throughout (with negative detail inbetween) and really provide a sense of elegance and warmth to the build. Nice work guys!

Product alternatives / Euro Birch

You may be well aware of the supply-chain issues that has hit our shores in recent times. We have faced some limitation in sourcing our flagship product Euro Birch - used for wall and ceiling linings, cabinetry and furniture. Unfortunately as some of our Birch ply stems from Russia, it has been difficult to obtain. However we always offer solutions to any issues that may arise. Here pictured are three options that we confidently can offer as alternatives to Euro Birch for wall and ceiling options.

Purely Maple

Classique Birch PRE

Canadian Oak PRE

Cabinetry / Lava Glass, Taupo

Lynden Over, master Glass artist, and artist Christine Robb, met at art school and have worked together on their creative vision, to create Lava Glass. Starting from a bare block of land in 2002, Lynden and Christine have continuously developed the space to incorporate a world-class gallery, an award-winning cafe, and a garden of national significance, all adjacent to the bespoke studio space for Lynden to create his masterpieces.

Together they work constantly striving for new innovative ways of depicting the New Zealand landscape in glass. The dramatic landscapes are the inspiration, glass the canvas.

Derek was thrilled to call in to see them lately to see new cabinetry that has been created for their artworks. Keruing Brownwood is extremely strong and a beautiful plywood of choice that complements their pieces we think so naturally. The units were built by Stu Martin Joinery in Taupo - ka pai!

Showroom Project / Ultimate Kitchens - Beam Oak Stone

A gorgeous kitchen from Ultimate Kitchens is being showcased now in their KeriKeri showroom. A mesmerising space designed by Stephan and Caryn. They pride themselves on being a complete place for designing, manufacturing and installing new kitchens, bathrooms, flooring, bespoke furniture and interior renovations for all of Kerikeri and surrounding areas in Northland. - Lucky them!

Showcased below is our Timber Veneer - Beam Oak Stone Grey, it has numerous imperfections which give it real character. Small splits and knots and a veneer laid in random planks provide the beam effect. It is available on a Birch Ply or MR-MDF core.

Awarded Project / Spacebar Design

Spacebar Design have created an exceptional kitchen space for their client in Titirangi, inspired by the large native trees and natural lighting. Our **Furnier American Walnut Veneer** captures the warm earthy tones and invites these aspects inside. The lighting breaks up the complexity of the Walnut wood grain, deepening it's rich tones and highlighting the Matte black cabinetry.

This kitchen has been entered into the Best Design Awards and is now a finalist. Congrats to the team at Spacebar Design for creating the perfect multi-generational space for their client. Good luck for a win!
