Colour	Light golden brown
Texture	Raw, Sanded
Glue bond	Veneer - PVAC D3 (EN204) Birch - Exterior Phenolic
Origin	Veneer - America, Manufacture - Slovakia
Certification	FSC & PEFC Certified Supplier

HANDLING & APPLICATION / Furnier, despite being a very durable product is still vulnerable to moisture and UV. Consequently it is the users responsibility to ensure the sheets are sealed with a protective coating to give the product the necessary protection from UV moisture and for the desired performance. This is a natural product that can be affected by changes in weather conditions: moisture and temperature. Increased moisture content temperature variation may cause internal stresses causing previously flat sheets to bow.

At Plymasters, precautions are taken to minimise this effect. However, once the panel has left our warehouse we cannot guarantee sheets to remain flat unless fastened. This is particularly important where free standing kitchen/ cabinet doors are concerned. When storing panels, stack on a firm raised base with enough support to prevent sagging. Cover the pallet to protect top and edges.
